We'll see if that matters GM seems to be the last of the full-size makers to get the message that folks really do want four-door trucks.. Remember when four-door pickups were oddities? Railroad crews and oil drillers used them to pack sweaty guys into remote landscapes, but regular folk never gave them a second thought, except to pronounce them "monumentally misshapen.. It drives superbly—car guys can easily relate to it—but it doesn't swagger That's a problem for truck buyers.. We gotta get all that stuff home, then haul away the postconsumer jetsam These big boys never say no to any civilian-size load.. The Tundra, like everything Toyota, has a silence and sophistication about it that makes it the Miss Manners of the truck world. e10c415e6f
