0 AND 9 2 (lower firmwares may be supported one day, but, without a new kernel exploit, there is no chances for 9.. New way for players to play Eshop with code bin on their New 3DS and Old 3DS (9 0-9.. 2) It makes you can go to the Eshop without the newest Firmware CURRENTLY IT IS ONLY AVIALABLE BETWEEN 9.

A screenshot of a Windows command prompt window titled "C:\Windows\system32\cmd.exe". The window shows the execution of a Python script named "3DSFAT16tool.py" with the command: `C:\Users\Luis\Desktop\FBI injection>3DSFAT16tool.py -d emunand.bin emunand.fat16.bin`. The script outputs a warning message: `File "C:\Users\Luis\Desktop\FBI injection\3DSFAT16tool.py", line 12` followed by `print '*****\n!!!!Warning - Only tested with Python 2.7!!!!\n*****\n'`. A `SyntaxError: Missing parentheses in call to 'print'` is displayed. The prompt then shows `C:\Users\Luis\Desktop\FBI injection>`. A large, semi-transparent "photobucket host. store. share." watermark is overlaid on the right side of the command prompt window.
